

"Beach" Exercise Saddle

Made In
Australia

Aeropanel

All our saddles are fitted with our new Aeropanel specially designed using a 3D mesh polyester that absorbs pressure much like a Gel Pad but using air not gel so it is much lighter.

Features

Same design as classic but fully synthetic(except points). Originally made in 1996 from fabric laminated foam for beach work. In 2013 we started using an Embossed neoprene and it soon became our most popular saddle Australia wide and is also being used in Asia. Known by many track riders as the sticky saddle due to its anti slip material, it is not only comfortable but hard wearing.

(As nylon webbings are abrasive and prematurely wear out the flaps on your saddle we recommend the use of our stirrup leathers with the leather on top of webbing)

Fully Synthetic Saddle made an embossed neoprene

Plastic 1/2 Tree with stainless steel gullet plate

English chrome girth points

Large flaps with pvc synthetic leather inserts

Fitted with "Aeropanel" preventing pressure points

Fully made in our factory in Seaford, Victoria, Australia

Used by leading Trainers in Australia and overseas

Weight 3.2KG

Price \$450.00 unmounted incl GST
