

"Classic" Exercise Saddle

Made In
Australia
Australia

Aeropanel

All our saddles are fitted with our new Aeropanel specially designed using a 3D mesh polyester that absorbs pressure much like a Gel Pad but using air not gel so it is much lighter.

Features

This is our original saddle we have made over 2000 since 1993, most of which are still in use today

(As nylon webbings are abrasive and prematurely wear out the flaps on your saddle we recommend the use of our stirrup leathers with the leather on top of webbing)

All Leather Saddle made from quality hand picked hides

Improved Steel 1/2 Tree

English chrome girth points

Large leather flaps

Fitted with "Aeropanel" preventing pressure points

Fully made in our factory in Seaford, Victoria, Australia

Used by leading Trainers in Australia and overseas

Weight 3.5 KG

Price \$450.00 unmounted incl GST
