Aeropanel

All our saddles are fitted with our new Aeropanel specially designed using a 3D mesh polyester that absorbs pressure much like a Gel Pad but using air not gel so it is much lighter.

Features

Designed in 2005 for the Hong Kong market, this saddle was redesigned for the Australian market. With no centre seam in the seat, and solid leather flaps, this saddle has proven to be very popular in some of Australia's biggest racing stables.

Available in Brown only.

All Leather Saddle made from quality, hand picked US and NZ hides.

Plastic 1/2 Tree with steel pressed gullet plate and stirrup bars,

English chrome girth points

Large bridle leather flaps with knee insert for better grip

Fitted with unique "Aeropanel" preventing pressure points

Proudly all Australian made.

Used by leading Trainers in Australia and overseas

(As nylon webbings are abrasive and prematurely wear out the flaps on your saddles, we recommend the use of our stirrup leathers with the leather on top of webbing)

Weight 3.4 Kg

Price \$660.00 unmounted incl GST
