"Classic" Exercise Saddle

Made In
Australia
Australia

Aeropanel

All our saddles are fitted with our new Aeropanel specially designed using a 3D mesh polyester that absorbs pressure much like a Gel Pad but using air not gel so it is much lighter.

Features

With over 2000 of these saddles sold since 1993, most of which are still in use today, this saddle has proven to be a stayer in the market.

All Leather Saddle made from quality NZ hand picked hides

Improved Steel 1/2 Tree English chrome girth points

Large leather flaps

Fitted with unique "Aeropanel" preventing pressure points

Fully made in our workshop in Victoria, Australia

Used by leading Trainers in Australia and overseas

(As nylon webbings are abrasive and prematurely wear out the flaps on your saddles we recommend the use of our stirrup leathers with the leather on top of webbing)

Weight 3.6 KG

Price \$570.00 unmounted incl GST

Exercise Saddle

“Classic Mk 2”

“Classic Suede”

Aeropanels

All our saddles are fitted with our new Aeropanel specially designed using a 3D mesh polyester that absorbs pressure much like a Gel Pad but using air not gel so it is much lighter.

Leather Panel Top

Firm Foam

3D Mesh

SoftFoam

Suede Lining

Features

Classic Mk 2 Weight 3.6 KG

This is the same as the Classic but with bridle leather flap inserts for better wear. First made in 2003 we have restyled the inserts for a more stylish and effective finish.

Classic Suede Weight 3.5KG

This is the same as the Classic but made with a beautiful lush suede which gives grip and durability. Available in a variety of colours.

(As nylon webbings are abrasive and prematurely wear out the flaps on your saddle we recommend the use of our stirrup leathers with the leather on top of webbing)

All Leather Saddle made from quality hand picked hides

Improved Steel 1/2 Tree

English chrome girth points

Large leather flaps with bridle leather inserts

Fitted with “Aeropanels” preventing pressure points

"Beach" Exercise Saddle

Made In
Australia

Aeropanel

All our saddles are fitted with our new Aeropanel specially designed using a 3D mesh polyester that absorbs pressure much like a Gel Pad but using air not gel so it is much lighter.

← Memory Foam

← 3D Mesh

← Neoprene Lining

The Beach (Australia's favourite everyday Exercise saddle is not just for the beach! When first developed it was intended to be a saddle used for beach work. This proved to be ideal for the job. But now most never see the beach. They have become the favourite saddle of all time to do every day trackwork.

Features

Same design as classic but fully synthetic (except points).

Originally made in 1996 from fabric laminated foam for beach work.

Then in 2013 an embossed neoprene was introduced, and it soon became the most popular saddle Australia wide. It is also being used extensively in Hong Kong, China, New Zealand and Europe. Affectionately known by many track riders as the sticky saddle, due to its anti slip material, it is not only comfortable but hard wearing.

Available in Black.

Available in a variety of coloured trims, which can be added to the cantle area for a personal touch

Fully Synthetic Saddle made an embossed neoprene

Plastic 1/2 Tree with steel pressed gullet plate and stirrup bars.

English chrome girth points

Large flaps with pvc synthetic leather inserts

Fitted with unique "Aeropanel" preventing pressure points

Fully made in our workshop in Victoria, Australia

Used by leading Trainers in Australia and overseas

(As nylon webbings are abrasive and prematurely wear out the flaps on your saddle we recommend the use of our stirrup leathers with the leather on top of webbing)

Weight 3.2KG

Price \$520.00 unmounted incl GST

Trend Saddle

This new saddle is available in a number of colors upon request

Aeropanel

All our saddles are fitted with our new Aeropanel specially designed using a 3D mesh polyester that absorbs pressure much like a Gel Pad but using air not gel so it is much lighter.

Features

This saddle is a hybrid of the two most popular saddles, The Classic and The Beach.

It is made from the same pattern as the Beach saddle, but beautiful NZ leather is used in place of the embossed neoprene on the seat. Japanese Suede is used on the panel lining, matching the Classic.

Nubuck Synthetic Leather in the wear area on the flaps

Plastic 1/2 Tree with steel pressed gullet plate and stirrup bars.

Fitted with unique “Aeropanel” preventing pressure points

English chrome girth points

Fully made in our new factory in Cobden, Victoria Australia .

Weight 3.2kg

Price \$590.00 unmounted incl GST

"Elite" Exercise Saddle

"Saddle Accessories"

All Made at our workshop in Victoria from first grade materials

Webbing Sursingle:

Traditionally made as we have for over 35 years using Australian made webbing, English Elastic, 7/8" English Girth Chrome point and 7/8" stainless steel buckle
Price \$65.00 incl gst

Leather web lined 1" Stirrup Leathers:

Our Stirrup Leathers are made with the Leather on the top side of the webbing. This is to slow the wearing of the flaps as nylon webbings are abrasive and prematurely wear the flaps of your expensive saddles. Quality leather is lined with Australian made load restraint webbing and 1" Stainless Steel buckles.
Size Standard 52"and Long 60" **Price \$50.00 incl gst**

Webbing Breastplate:

Our Breastplates are made from quality Australian made webbing and PVC, have English Elastics and Stainless Steel 3/4" Buckles.

Various stable colours available on request

Price \$75.00 incl gst

Leather Open Front Boots:

Designed for jumps Racing by leading Tainers these boots are made from top quality leather and neoprene lined. We use quality brass buckles with Stainless steel tongues.

Price \$130.00 incl gst

HISTORY

In 1979, David Gumbrell started his career as a saddler at the age of 16 in a small workshop in Mentone Victoria.

By 1983, David had started manufacturing heavy duty saddlery for local horsemen and riding schools, later moving to Queensland to make saddles at Syd Hill and Sons in 1986.

After returning to Melbourne in 1989, David worked with Master Saddler Bob Wilson learning the fine art of Turnout Saddlery for the show industry. This led David to make saddlery for some of Australia's top show riders.

In 1996, David decided to manufacture primarily for the racing industry and started David Gumbrell Saddles. This began with the half tree exercise saddle (the Classic) and whilst spending time on the training tracks all over Australia, David was able to see the needs of trainers and riders which enabled him to alter and develop a range of different styles. These have been proven to outlast and outperform competitors.

All saddles continue to be made in Australia and can be custom designed for individual needs.

Today, over 40 years on, the quality and durability of David Gumbrell Saddles are renown Australia wide and internationally and are exported to Hong Kong, Singapore, New Zealand and the USA .
